

Exit Signs - ESG & Financial Benefits

Exit signs are legally mandated for compliance. Building owners/occupiers continually spend significant operational & maintenance costs to ensure they remain operational and compliant with all relevant codes.

Clients are joining the global movement, choosing this shift to reliable Smarterlite technology over traditional fittings that continually fail, are more expensive & emit higher carbon emissions. Listed below are some of our clients who are capitalising on tangible & significant environmental & cost benefits for up to 20 years.

"We are constantly investigating new technologies that align to our sustainability strategy, the reduction in the waste by regularly replacing traditional exit signs was a key benefit helping achieve our resource efficiency goals."
Michael Williams
Telstra InfraCo Energy Manager

National Roll Out across Telstra Network

3,150 fittings installed to date, across more than 200 facilities

 Savings	 Carbon (Tonnes)
\$6.5M	4.3K
 eWaste (Tonnes)	 Electricity Usage
36.2	↓87%

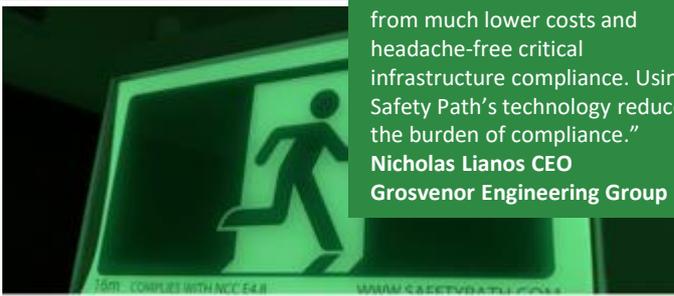

"Given our net zero emissions target by 2030, we've been looking at innovations like this ensuring the safety & fit with our reputation."
National Optimisation Manager

Upgrade of two of shopping centre common areas in Victoria

80 fittings upgraded across the facilities

 Savings	 Carbon (Tonnes)
\$186K	34
 eWaste (Tonnes)	 Electricity Usage
1	↓68%

"Grosvenor's clients will benefit from much lower costs and headache-free critical infrastructure compliance. Using Safety Path's technology reduces the burden of compliance."
Nicholas Lianos CEO
Grosvenor Engineering Group

Grosvenor manage more than 12,000 commercial buildings

Upgrading **1000 fittings** will provide Grosvenor and their customers with the following benefits:

 Savings	 Carbon (Tonnes)
\$1.2M	350
 eWaste (Tonnes)	 Electricity Usage
6	↓74%

"This product is a no brainer, it lasts longer, is cheaper to maintain & saves our group significant money on what is a hidden cost to our portfolio"
Alfonso Liuzzi, Director

Liuzzi holds retail, office and industrial assets & started a national rollout

Have installed **644 fittings**

 Savings	 Carbon (Tonnes)
\$1.2M	477
 eWaste (Tonnes)	 Electricity Usage
